CONTENTS OF ISSUE 132(1)

Topical Issue on the Status of the
International High-Temperature Reactor Development
Edited by K. Kussmaul

Preface, *K. Kussmaul* ix

Developments of metallic materials and a high-temperature structural design code for the HTTR, *K. Hada, I. Nishiguchi, Y. Muto and H. Tsuji* 1

Application of new design methodologies to very high-temperature metallic components of the HTTR, *K. Hada, M. Ohkubo and O. Baba* 13

Graphite core structures and their structural design criteria in the HTTR, *T. Iyoku, S. Shiozawa, M. Ishihara, T. Arai and T. Oku* 23

Release of short-lived noble gases from HTGR fuel with failed coated fuel particles and contaminated matrix, *T. Ogawa, F. Kobayashi, T. Tobita, K. Fukuda, T. Saitoh, I. Yokouchi and M. Obata* 31

Safety characteristics of the High Temperature Engineering Test Reactor, *M. Shindo, F. Okamoto, K. Kunitomi, S. Fujita and K. Sawa* 39

Design criteria for liners of concrete vessels of future HTRs, *R. Oberpichler* 47

Design criteria for prestressed concrete pressure vessels for High Temperature Reactors, *K. Schimmelpfennig* 53

The HTR module pressure vessel unit; design criteria and safety philosophy, *G. Neumann, K. Heidt, K. Dumm and H. Rothfuß* 63

Structural design criteria for HTR – a summary report –, *F. Schubert, H. Nickel and G. Breitbach* 75

Present status of the High Temperature Engineering Test Reactor (HTTR), *S. Saito, T. Tanaka and Y. Sudo* 85

The Status of HTGR Research and Development in China (technical note), *D. Wang, D. Zhong and Y. Xu* 95

Instructions to contributors 99

CONTENTS OF ISSUE 132(2)

Engineering Mechanics, Structures and Materials

Testing, verification and application of CONTAIN for severe accident analysis of LMFBR-containments, *J. Langhans* 101

Effects of heat treatments on the stress corrosion cracking of alloy 600 in high temperature waters, *J. Congleton, B. Hemsworth, R.N. Parkins and P.M. Singh* 119

A model of failure criteria based on the bifurcation theory for nuclear fuel element cladding, *S. Mehedinteanu, L. Deaconu and D. Chirlesan* 133
Three-dimensional thermoelastic analysis of a cylindrical pipe with an internal surface crack under convection cooling, *W.-H. Chen and C.-C. Huang* 143

Thermal-Hydraulics and Related Safety
Erosion behavior of a solid plate by a liquid jet – Effect of molten layer , *A. Furutani, S. Imahori, K. Sato and M. Saito* 153
Melting attack of solid plates by a high-temperature liquid jet [II] – Erosion behavior by a molten metal jet , *K. Sato, A. Furutani, M. Saito, M. Isozaki, K. Suganuma and S. Imahori* 171
Scaling of natural circulation in PWR systems, *F. D'Auria, G.M. Galassi, P. Vigni and A. Calastri* 187
Dynamic behavior of a steam generator, *F. Fabrizi, M. Sala and G. Hetsroni* 207
A study of critical heat flux for low flow of water in vertical round tubes under low pressure, *S.H. Chang, W.-P. Baek and T.M. Bae* 225
Quenching degradation in-pile experiment on an oxidized fuel rod in the temperature range of 1000 to 1260 °C, *S. Katanishi, M. Sobajima and T. Fujishiro* 239
Subchannel analysis by the FIDAS code based on the three-fluid model, *S. Sugawara, T. Sakai, K. Watanabe and H.E.C. Rummens* 253
Image processing system for velocity measurements in natural convection flows, *S. Ushijima, H. Takeda and N. Tanaka* 265
Experimental study on density-wave oscillations in two identical channels, *G. Guido and J. Converti* 277

Announcement: Symposium on 'Tchernobyl 6 years later' 283

Instructions to contributors 285

CONTENTS OF ISSUE 132(3)

Engineering Mechanics, Structures and Materials
Equipment response spectra for base-isolated shear beam structures, *G. Ahmadi and L. Su* 287
Theoretical evaluation of rifled cladding for LWR fuel, *R.O. Montgomery, Y.R. Rashid and N. Kjaer-Pedersen* 309

Thermal-Hydraulics and Related Safety
Mixed convection recirculation flow in a vertical single-rod channel connected to an upper plenum, *A.-R.I. Barakat and N.E. Todreas* 317
Study and application of boiling water reactor jet pump characteristic, *L.-Y. Liao* 339
Heat transfer in rod bundle subchannels with varying rod–wall proximity, *M.S. Guellouz and S. Tavoularis* 351
A comparison of predictions of high-temperature steam properties, *A. Vasić, S.C. Cheng and D.C. Groeneveld* 367
Pool-boiling/bubbling void fraction in an annular flow channel, *Y. Koizumi, H. Kumamaru, Y. Mimura, H. Murakami and K. Tasaka* 381
Conjugated heat transfer in a concentric annular pipe, *D. MacGrath, G. Yang and M.A. Ebadian* 393

Discussion on the papers presented in the Topical Issue on Quantifying Reactor Safety Margins (Nucl. Engrg. Des. 119, No. 1 (1990))

Preface, *T.G. Theofanous* 403

Comments on the papers

Quantifying reactor safety margins: What remains to be done, *A.J. Wickett and I. Brittain* 405

Comments on 'Quantifying Reactor Safety Margins', *L.E. Hochreiter* 409

Comments on 'Quantifying Reactor Safety Margins', *E. Hofer, H. Karwat and W. Werner* 411

Applicability of the CSAU methodology to safety assessments, *H. Holmström and H. Tuomisto* 415

Comments on 'Quantifying Reactor Safety Margins', *J.-P. Sursock* 417

Comments on 'Quantifying Reactor Safety Margins', *G. Petrangeli* 419

Comments on 'Quantifying Reactor Safety Margins', *M. Shiba* 423

Comments on 'Quantifying Reactor Safety Margins', *G. Yadigaroglu* 425

Authors' response

TPG response to the foregoing letters-to-the-editor, *G.E. Wilson, B.E. Boyack, I. Catton, R.B. Duffey, P. Griffith, K.R. Katsma, G.S. Lellouche, S. Levy, U.S. Rohatgi, W. Wulff and N. Zuber* 431

Supplement to the discussion

Application of PWR LOCA margin with the revised Appendix K rule, *L.E. Hochreiter, R.D. Ankney, M.Y. Young and S.P. Kalra* 437
